

## Shadows...

shadows...

shadows are always there...

shadows...

shadows are always following me...

shadows...

Although, the word has a dark image...

shadows...

They are really important for my life.

shadows...

They show us the existence of something...

shadows...

They tell me the depth of the world...

shadows...

They make my daily life more interesting...

shadows...

shadows are always there...

## Shadow room

This is a shadow room. There are only you, shadow and a book on a desk in a white room. You can just think about the surroundings, just think about shadow. Remember how shadow is working for you.

People often tend to think about shadow secondly as people take it for granted. In this project, shadow that is secondary product by light and not highlighted, but they have a big part in our living and are celebrated in this quiet and neutral space.
